

PACIFIC GROVE UNIFIED SCHOOL DISTRICT

NOTICE TO PARENTS OF NEW STUDENTS

A. Residency Requirements

Due to the District's financial condition and resulting capacity constraints we can only afford to provide education for students who are legally residing within the boundaries of the school district. Legal residency is defined by the residency of the student's legal guardian or documented legal care-giver (as approved by the District). Proof of residency of the legal guardian must be provided upon request to the school site. Such proof shall consist of documents such as a PG&E bill, long-term lease agreement, a driver's license, home or renter's insurance policy, or other equivalent official documents that clearly establish that the legal guardian resides at the identified address within the District boundaries. Adequacy of documentation is to be determined by the District. If, during the course of the year, a question is raised about the continued residency of a student then updated verification of residency may be required by the school site. If, during this updating process, it is determined that the student is no longer a resident of the District, then the student will be directed to transfer to the appropriate school district. Any questions concerning this residency requirement should be directed to the Assistant Superintendent at 646-6509.

B. Class Size Concerns

Due to the District's interest in minimizing class sizes at each grade level, there is a possibility that your child may be reassigned to the other District elementary school or to another class during the school year. To provide consistency and stability in your child's educational program the assignment may be for one year, or longer if conditions persist. The school district will provide transportation to and from school for students who are reassigned due to District class size concerns.

The District's goal is to provide a quality educational program for your child and for all students served by the District. In order to achieve this goal, our District must require compliance with the above noted concerns. Your cooperation and understanding is appreciated.
